A.G. Coombs

Focusing on the areas of Advisory, Projects, Service and Technical Management, A.G. Coombs provides a fully responsive, client-driven service that's in tune with today's needs.

Delivering performance, managing costs, minimising risk.

A multi-service specialist provider

No matter what size your project, A.G. Coombs can provide your building services – from design, install and commission through to ongoing advice, service, maintenance and operation for all the systems that bring buildings to life, including air conditioning, ventilation, fire protection, electrical power and lighting.

With over sixty years' experience, A.G. Coombs has built an enviable reputation for quality and service. We stand at the forefront of the industry with the skills and resources necessary to handle the most complex and demanding projects.

Our long list of successfully completed, multi-million dollar projects is testament to the fact that A.G. Coombs has become the preferred contractor to a number of leading organisations. When projects must deliver on time, perform to specification and come in on budget, A.G. Coombs is the building services provider that many companies rely on for projects both large and small.

Our people are key to our success

High quality staff is our major strength. The company's long-standing policy of attracting and developing only the best continues to reinforce a reputation that A.G. Coombs is 'the place to work'. This is reflected in our commitment to training and workplace safety, which has made us the industry leader in these areas.

'Whole of life' is another key consideration

With more sophisticated building services, the need for sustainability and increasing regulatory pressures placing greater emphasis on operating costs, A.G. Coombs has the technical skills necessary to ensure that you get the best out of your building over its effective life span.

As a single point provider of systems design, project management, construction, maintenance, operation and technical advisory services, A.G. Coombs has built up many long term relationships with buildings and their owners or managers. This retained knowledge ensures reliable and energy efficient operation, timely repair, effective upgrades and modifications.

Cost management

The ability to manage costs in buildings is fundamental. With its proven management skills, A.G. Coombs has delivered some of the largest and most complex building services projects in Australia, on time and on budget. In many instances, our re-engineering ability results in significant cost reductions and improved outcomes. In-depth understanding of design criteria, coupled with our commissioning abilities and operational knowledge, allows us to maintain and tune systems to minimise operational maintenance and energy costs.

Risk minimisation

Buildings are increasingly complex and regulated in design, construction, performance and operation. A.G. Coombs maintains a practiced focus on minimising and managing risks for our valued clients and their many projects from 'designing to code' through to site safety, project management, maintenance of essential safety measures, Star rated energy efficiency performance and trouble free operation.

Advisory

The company offers:

- Energy Management and Building Tuning
- Regulatory Compliance Advice
- Essential Safety Measures Appraisals
- Indoor Air Quality Testing and Advice
- Project Scoping and Budgets
